YOUR PARTNER FOR LOCAL GROWTH

More customers, with a solution built for your business

We are a partner focused on your success. First we analyze what your business needs. Then we implement the solution that brings you new customers.

SOLUTION TAILORED TO YOU	SERVICES TO BUILD IT FROM	MARKETS SERVED

WE SERVE BUSINESSES IN

Australia · Canada · Costa Rica · Europe · United Kingdom · United States

OUR APPROACH

A partner focused on your success

A website, a few reviews or a Google profile do not bring customers on their own. A solution built for your business does, and we stay with you while it works.

Buying separate services

- Several providers who never coordinate
- Deliverables nobody measures against sales
- A package designed for someone else's business
- A price decided before anyone looked at yours

Working with a partner

- **One team accountable for your customer acquisition**
- **A solution built from what your business needs**
- **Services included only where they add value**
- **Results measured together, in plain language**

How we work

01

FREE

Needs analysis

The first call is free and it is the analysis: how you win customers today, where you lose them and what you need.

02

PROPOSAL

A tailored solution

We propose one solution built from the services you need, and quote it. A service may come included at no extra cost.

03

IMPLEMENTATION

We put it to work

We implement the solution while you keep your focus on serving your customers well.

04

TOGETHER

We measure and adjust

We review the results with you in plain language and adjust the solution to what changed.

BUILDING BLOCK 1 OF 5

Found first on Google, recommended by AI

The work that makes your business visible in local Google searches and in the answers AI engines give. When Local SEO is part of your solution, it comes with all three pillars.

Authority content

The content that establishes your business as a reference in its field.

- Keyword research
- Content clusters
- Content gap analysis
- Updates to existing content

Authority on Google and AI

Your business and your website as the reference that gets recommended.

- Optimized Google Business Profile
- On page local SEO for your website
- Local business structured data
- Presence in Google and AI results

Review management

Your reputation, measured and worked on month after month.

- Review growth tracked over time
- Positive and negative feedback trends
- Customer responses monitored
- Branded feedback links

OUR GOAL

The first position on Google for searches in your area. No provider can guarantee a specific ranking and we do not promise one: we commit to the work that leads there.

COMBINED TO FIT YOUR BUSINESS

Four more building blocks

Each one joins your solution when your business needs it, and it may come included at no extra cost.

WEBSITE DEVELOPMENT

Fast websites and PWAs, designed to turn visitors into customers.

- Performance anyone can check in PageSpeed Insights
- Structured data, translations and llms.txt for Google and AI
- Installable as an app on phones and computers

AI VOICE RECEPTIONIST

A voice agent that answers your calls, handles frequent questions and books appointments, 24/7.

- Appointments booked straight into your calendar
- Custom voice and script matched to your brand
- Optimized for English and Spanish

AI BUSINESS AUTOMATION

AI agents connected to the tools you already use, that follow up your customers and take repetitive work off your hands.

- Every enquiry answered at once and followed up until it books or says no
- Bookings, reminders, quotes and invoices, with you approving what matters
- A review request after every visit, to every customer

SOFTWARE AND MOBILE APP DEVELOPMENT

Full stack products with a Flutter frontend and a custom backend, for every device and screen.

- One codebase for iOS, Android, web and desktop
- Automated tests and a CI/CD pipeline
- Full source code ownership on delivery

Every solution is quoted after the free needs analysis. Quotes exclude VAT.

THE NEEDS ANALYSIS

What we look at in your first call

Every business loses customers in its own way. These are the gaps we check first, because they decide which building blocks your solution needs.

A website that does not convert

A slow website, or one that leaves the visitor's questions unanswered, loses the customer right before they get in touch.

Invisible on Google and AI

If your business does not show up when someone searches for your service nearby, or asks an AI assistant, a competitor takes that customer.

Calls nobody answers

A call that goes unanswered after hours or at a busy moment is a customer who may call someone else.

Terms

Quoted after the analysis

We publish no price list beyond the entry price. Every solution is quoted after the free needs analysis, according to what your business needs.

The entry price, then a monthly fee

You start with a first implementation for €500 + VAT that commits both sides and takes the first steps. After that, a monthly fee tied to the results we bring you, agreed in the proposal. The new customers the solution brings in are what cover it.

Quotes exclude VAT

VAT is added on the invoice where it applies, at the rate that applies to your business.

A goal, not a guarantee

We work toward the first position. Results also depend on your market and your competition.

CONTACT

Let's talk about your business

The first call is free, and it is where the needs analysis starts: where your business stands today and what it needs.
